

MY CAVE

Par Didier Marty

INTRODUCTION

Formation : Développeur Web

Projet : My Cave EPCF2

Développement d'une application web pour gérer une cave à vin virtuelle, et refléter mes compétences acquises.

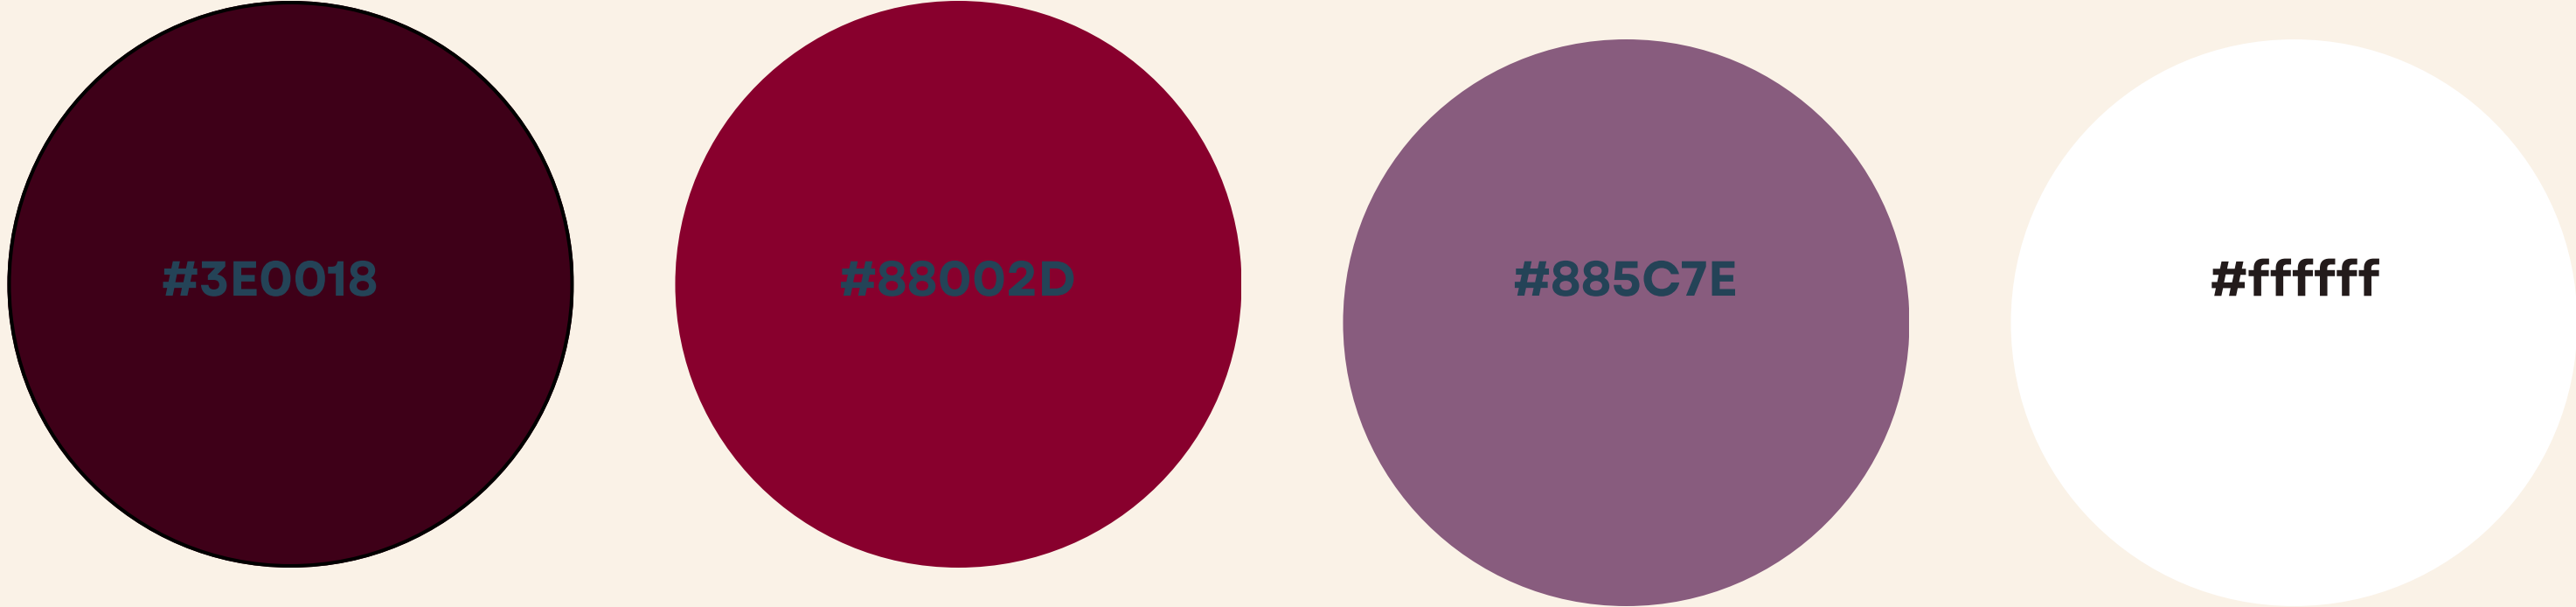

PRÉSENTATION DU PROJET

- Travail pour un client privé fictif souhaitant développer une application répertoire permettant la gestion d'une cave à vin virtuelle.
- Application comportant une de gestion de stock, servant à recenser et organiser les bouteilles de vin des utilisateurs.
- Expérience utilisateur naturelle, fluide et épurée respectant les “contraintes” du client selon sa charte graphique.
- Technologies : HTML5, CSS, SCSS, JavaScript, PHP, Symfony.
- Adaptabilité Desktop, Tablette, Mobile (desktop-first).
- Suivi de projet versionné avec Git

Moodboard

Kellem Hollanda's Profile

Member since June 2025

My name is Kellem Hollanda, I'm Brazilian and currently living in Italy. My professional background is primarily in the field of natural juices and non-alcoholic beverages, with a strong focus on healthy, high-quality products. Over the years, I've built partnerships across different markets, always committed to understanding and meeting consumer expectations.

The wine project is a recent and exciting new step for me. I'm just getting started, learning every day, and approaching this journey with curiosity and dedication. I'm currently representing Tribopala, a limited-production Vinho Verde crafted by the renowned Portuguese winemaker Rui Cunha. My goal is to grow in this field with authenticity and a clear connection between the wine, its origin, and the people who enjoy it.

I see the wine world as a space rich in learning and connection — and I believe it's possible to bring a fresh, ethical, and thoughtful perspective to it.

MAQUETTE FINALE

Réalisation sur Figma

Respect de la charte graphique définie

Version Desktop, Tablette et Mobile pour assurer le responsive

STRUCTURE

MyCave/

PRÉSENTATION (Front-end)

- Pages PHP (index, register, dashboard, add-wine)
- Assets (CSS compilé, images, fonts)

API

- api/auth.php (authentification)
- api/wines.php (CRUD vins)

LOGIQUE MÉTIER (Classes)

- User.php (gestion utilisateurs)
- Wine.php (gestion vins)

CONFIGURATION & UTILITAIRES

- config/database.php (connexion PDO)
- includes/session.php (gestion sessions)

DONNÉES

- database/schema.sql (structure BDD)
- uploads/ (images bouteilles)

Nunito

Application suivant une architecture MVC simplifiée

Modèle = Classes (User, Wine)

Vue = Pages PHP + HTML

Contrôleur = Pages PHP + API

Orientée PHP

Séparation des responsabilités

Approche API pour la partie dynamique.

Flux de données typique

1. dashboard.php (PHP/HTML)
↓ Charge la page avec session utilisateur
2. JavaScript fetch() → api/wines.php (GET)
↓ Requête asynchrone
3. api/wines.php instancie Wine.php
↓ Appelle getAllById()
4. Wine.php → PDO → MySQL
↓ Exécute SELECT avec préparation
5. Retour JSON → JavaScript
↓ {success: true, wines: [...], count: 12}
6. JavaScript DOM manipulation
↓ Génère dynamiquement les cartes HTML
7. Affichage final utilisateur

2. JavaScript fetch() → api/wines.php (GET) - Requête asynchrone

```
62 // Charger les bouteilles depuis l'API
63 async function loadWines() {
64     try {
65         const response = await fetch('api/wines.php');
66         const data = await response.json();
67
68         if (data.success) {
69             displayWines(data.wines);
70             updateBottleCount(data.count);
71         } else {
72             showError('Erreur lors du chargement des bouteilles');
73         }
74     } catch (error) {
75         showError('Erreur de connexion');
76         console.error('Erreur:', error);
77     }
78 }
```

3. `api/wines.php` instancie `Wine.php` - Appelle `getById()`

```
1 usage  👤 Didier Marty *
43  ~ function getWines() {
    global $user;
45
46     $wine = new Wine(); // Création de l'instance de la classe Wine
47     $wines = $wine->getByUserId($user['id']); // Récupérer les bouteilles de l'utilisateur
48
```

4. Wine.php → PDO → MySQL - Exécute SELECT avec préparation

```
© Wine.php ×
4      class Wine {
23      public function create() {
44      }
45
1 usage  👤 Didier Marty *
46      public function getByUserId($user_id) {
47          $query = "SELECT * FROM " . $this->table_name . "
48                  WHERE user_id = :user_id
49                  ORDER BY created_at DESC";
50
51          $stmt = $this->conn->prepare($query); // Requête préparée pour éviter les injections SQL
52          $stmt->bindParam( param: ":user_id", &var: $user_id); // Sécurisation de la variable user_id
53          $stmt->execute(); // Exécution de la requête
54
55          return $stmt->fetchAll( mode: PDO::FETCH_ASSOC); // Récupération de tous les résultats sous forme de tableau associatif
56      }
57

2 usages  👤 Didier Marty
```

5. Retour JSON → JavaScript

```
48
49  ✓  echo json_encode([
50      'success' => true,
51      'wines' => $wines,
52      'count' => count($wines)
53  ]);
54 }
```

6. JavaScript génère dynamiquement les cartes HTML

```
80 // Afficher les bouteilles
81 function displayWines(wines) {
82     const container = document.getElementById('wines-container');
83
84     if (wines.length === 0) {
85         container.innerHTML = `
86         <div style="text-align: center; color: white; padding: 3rem;">
87             <h3 style="margin-bottom: 1rem;">Votre cave est vide</h3>
88             <p style="...">Commencez par ajouter votre première bouteille !</p>
89             <button class="btn-primary" onclick="window.location.href='add-wine.php'">
90                 Ajouter une bouteille
91             </button>
92         </div>
93         `; // contenu pour cave vide
94         return;
95     }
96
97     container.innerHTML = wines.map(wine => createWineCard(wine)).join(''); // Génération dynamique des cartes
98 }
99
```

7. Affichage final utilisateur

Bienvenue dans votre cave didier

CHATEAU DE SAINT COSME

Année: 2009
Cépage: Grenache / Syrah
Pays: France
Région: Southern Rhone / Gigondas

The aromas of fruit and spice give one a hint of the light drinkability of this lovely wine, which makes an excellent

LAN RIOJA CRIANZA

Année: 2006
Cépage: Tempranillo
Pays: Spain
Région: Rioja

A resurgence of interest in boutique vineyards has opened the door for this excellent foray into the dessert

MARGERUM SYBARITE

Année: 2010
Cépage: Sauvignon Blanc
Pays: USA
Région: California Central Coast

The cache of a fine Cabernet in ones wine cellar can now be replaced with a childishly playful wine bubbling over
